OPNsense® Rack Security Appliance
DEC3800 Series

specifications of DEC3862

17Gbps **FIREWALL**
2.5 Gbps **IPsec VPN**
512GB **Storage**
32GB **DDR4 RAM**

AMD EPYC™ Performance.

Rack mountable appliance, the full package at an affordable price.

Exceptional performance for businesses & enterprises.

17Gbps Throughput
1.5 Mega Packets per Second

Guard Web Access Filtering (SSL) Proxy Captive Portal with Voucher support

~2Gbps Inline Intrusion Prevention

512GB SSD
Offering Sufficient Space for Logging & Reporting

Fast Filtering
Up to 50.000 Connections per Second

System wide two-factor authentication.
Compatible with Google Authenticator.

Hardware Assisted Encryption
2.5Gbps IPsec (AES256GCM16)

OPN sense®

OPNsense® Secure Your Network With Ease™

OPNsense is Deciso's fast growing open source firewall and security platform released under an Open Source Initiative approved license. Its rich feature set is combined with the benefits of open and verifiable sources.

All features can be used from within the easy to use graphical interface, equipped with a build-in search feature for quick navigation. Protecting your network has never been this easy with features such as; the integrated intrusion prevention system and two-factor authentication for safely connecting mobile users.

Businesses
Protect your business network and secure your connections.
From the stateful inspection firewall to the inline intrusion detection & prevention system everything is included for free.Use the traffic shaper to enhance network performance.

Schools
Limit and share available bandwidth evenly amongst students and utilize the category based web filtering to filter unwanted traffic such as adult content and malicious websites. It is easy to setup as no additional plugins nor packages are required.

Hotels
OPNsense offers a captive portal to control guest internet access for a limited duration. Vouchers can easily be created via the graphical user interface.

On the road
Even on the road OPNsense is a great asset to your business as it offers OpenVPN and IPSec VPN solution with road warrior support and two-factor authentication. The easy client exporter make configuring your OpenVPN SSL client setup a breeze.

Remote Offices / Branches & SOHO
The integrated site to site VPN (IPsec or SSL VPN) can be used to create a secure network connection to and from your remote offices. Enjoy the easy configuration and online searchable documentation with simple how-to type of articles to get you started, quickly. Pluggable support is offered for ZeroTier, Tinc as well as Wireguard.

[1] The user interface is designed for normal business usage, large rulesets, high number of users or interface assignments may be less practical.

All measurements are based upon TCP traffic unless stated otherwise. Total Firewall Throughput is calculated based on maximum PPS and standard 1500 byte packets. Maximum PPS is measured using 500 byte packets. IPS performance is measured using ET Open and standard 1500 byte package size. SSL VPN is measured using AES256GCM16+SHA512. Concurrent sessions are based upon memory available, where one state consumes 1KB of memory and 1GB of memory is reserved for system tasks. Latency is measured as an average over 60 seconds.
